Smart Industries in Malaysia Produces Quality PSU

Smart Industries has a professional management team and well trained staff, providing mass production. All products are fully inspected in the production process to ensure quality. For real-time monitoring of product quality and production tracking, the factory has fully implemented a production history system - Manufacturing Execution System (MES) to improve production quality and efficiency. The factory also meets environmental protection requirements, and RoHS standards.

Electro-static Discharge Protection

Burn-In Testing

Testing PSU in high temperature and harsh environment

Initial / Hi-Pot Testing

Verifying PSU to meet international safety regulations

ATE Function Testing

Final testing via Chroma 8000 to ensure product quality

TIGER POWER Has Abundant Design Experience of PSU

Lead year's headquarters, located in NeiHu, Taipei, is committed to the design and manufacture of switching power supplies, providing partners with power solutions tailored to their needs. In order to meet customers' requirements for manufacturing quality, we established production bases in Malaysia and Dongguan, China. The factories are certified by ISO-9001 quality management system and ISO-14001 environmental management standards.

Why TIGER POWER ?

*There are **5** reasons to become our partner~*

- 1. Design superior quality switching power supplies**
- 2. Provide certified products aligned with regulations**
- 3. Manufacture highly-consistent, quality products**
- 4. Delivery flexibility based on customer's needs**
- 5. Fully provide optimal support**
